

# ALBAMURAL.

In presenting this edition of our Circular we desire to reiterate and emphasize the claims hitherto made for "ALBAMURAL," namely, that for the purposes for which it is designed it is superior to all other Wall Coatings, especially in point of

## WHITENESS, DURABILITY, ADAPTABILITY AND ECONOMY.

"ALBAMURAL" has been extensively imitated, but the counterfeits are invariably weak in most or all of the essential features which make this Wall Coating valuable. They are, without exception, compounded upon the crudest formulas—being composed simply of something fairly white, in connection with something moderately adhesive—while "ALBAMURAL" is the result of years of experience and careful experiment and is made up of *no less than seven different ingredients*, each performing its own peculiar function, and all uniting to form a Coating which, for the uses designated, has never been equalled.

We maintain that its facility of preparation and use, and its great durability, make "ALBAMURAL" actually more economical than Lime Whitewash.

## MINERALBA—COLD WATER PAINT.

To satisfy the demand for a Wall Coating or Paint which, for convenience, can be mixed in *Cold Water*, we supply "MINERALBA," and recommend it as the best article of that kind. But it should be stated that any Wall Coating whose adhesive element is soluble in cold water is, of necessity, deficient in point of durability, since only the weakest of "binders" are available for the purpose.

We therefore believe that, except where a saving in first cost is desired rather than ultimate economy, consumers will find it to their interest to use "ALBAMURAL" rather than *any* cold water preparation.

# ALBAMURAL

means and makes

## WHITE WALLS.

It is  
"THE WHITEST THING  
IN CREATION"

## ALBAMURAL IS A HOT WATER PAINT,

Or Wall Coating, which is expressly designed for, and especially adapted to use on interior Walls or Ceilings (of Wood, Brick, Stone or Ordinary Plaster) in **Manufactories** of all kinds, as well as in **Public Buildings, Hospitals, Prisons, Electric Light Stations, Power Houses, Railroad Depots and Shops, Horse Car Stables**, and in all places where a **Durable and Inexpensive Wall Coating** is desired, and where the **Greatest Available Amount of Light** is required. It has been in the market for many years, and the following pages give conclusive proof that it has all the virtues that are claimed for it. Unlike many of the hap-hazard compounds which are offered at low prices, it is the result of years of experience and experiment, and is composed of *no less than seven different ingredients*, each performing its own peculiar function, and all uniting to form a Coating which, for the uses designated, has never been equalled.

*The cost of the best, on any job, is so little in excess of the cost of the poorest that nothing but the best should ever be used.*

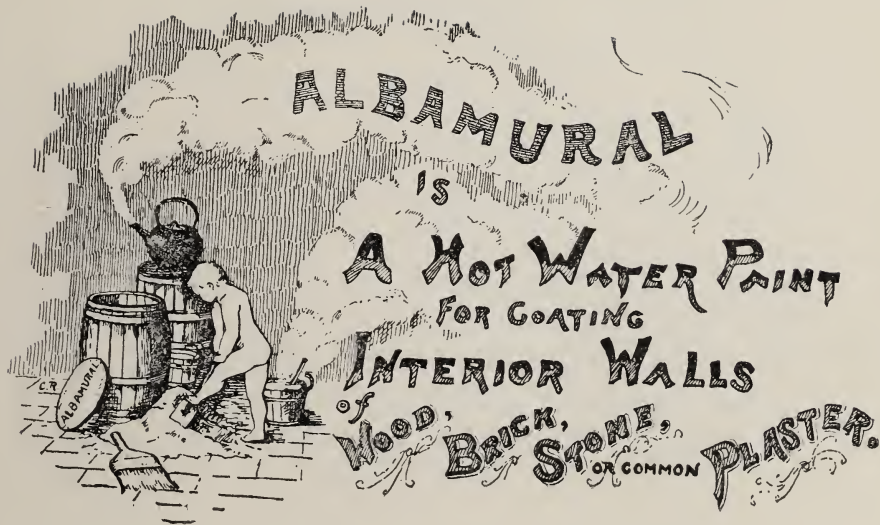

## MINERALBA---COLD WATER PAINT.

To satisfy the demand for a Wall Coating or Paint which, for convenience, can be mixed in *Cold Water*, we supply "MINERALBA," and recommend it as the best article of that kind. But it should be stated that any Wall Coating whose adhesive element is soluble in cold water is, of necessity, deficient in point of durability, since only the weakest of "binders" are available for the purpose.

We therefore believe that, except where a saving in first cost is desired rather than ultimate economy, consumers will find it to their interest to use "ALBAMURAL" rather than any cold water preparation.

Mess. Starks Edson & Co.,  
Saxtons River, Vt.

Gentlemen:-

Replying to your favor of recent date, asking whether we have found Albamural satisfactory, we would say that we referred the same to our painter, who answers the question as follows: "I have had 35 years experience with paints and substitutes, and 5 years experience in using Albamural, during which time I have used nearly 2,000 lbs in the Company's mills with satisfactory results. I am free to say that as a Wall Coating Albamural is superior to any that I have used, as it can be applied to any surface, rough or smooth, either on Wood, Brick, Stone or Plaster finish, two coats usually being sufficient to give a smooth, even finish equal to French zinc; it can be applied over paint, and paint can be used over Albamural, the latter forming a priming, as it will not chalk, crack or scale; its color is not affected by sulphur or gases, and it can be subjected to a high degree of heat if not applied too thick.

I have used Albamural in tints for walls and ceilings, and for smoothness of finish and durability have found it fully equal to any prepared tints that I have used."

Yours truly,

Colchester Rubber Co.

*Brooklyn, Sept. 4th. 1890.* 483

Gentlemen:

Enclosed please find an order for 3000 lbs. of Albamural, which you will deliver as early as possible , as we wish to place it on a building which is nearing completion .

The 2000 lbs. which we purchased of you in April last has been tested in a number of places on brick, wood, iron and over coats of white-wash which we formerly used in our stables

It has given very great satisfaction , and I am surprised and pleased at its whiteness and apparent durability . I feel sure that this article is going to find a prominent position in the market with this class of goods .

Wishing you the best success, I have the pleasure to remain

Yours very truly,

3 ORDERS. 5300 LBS.

Messrs. Starks Edson & Co.,

Saxton's River, Vt.

Gentlemen:--

We take great pleasure in recommending the albamural which you make. We have used it now for three successive seasons and find it goes far ahead of any prepared kalsomine, whitewash or other similar material.

Your request to use our name among your published list of customers meets with our approval.

Yours truly,

J. J. Adams & Co.

# ▲ ▲ ▲ PRICE LIST. ▲ ▲ ▲

*All F. O. B. Cars at Bellows Falls, Vt.,  
Or, at 1-2c. per pound extra, in store in New York, Cincinnati, Detroit, Chicago or St. Louis.*

## ALBAMURAL.

*Boxes, 25, 50 and 100 lbs., 6c. per lb.*

*Barrels, \*300 to 550 lbs., 5 1-2c. per lb.*

## MINERALBA.

*Bags, 25, 50 and 100 lbs., 4 1-2c. per lb.*

*Barrels, \*300 to 550 lbs., 4c. per lb.*

\*Barrels of almost any size within the range named can be furnished, and the Manufacturers request that Customers state as nearly as possible the desired quantity. Otherwise, on orders for "barrels," the largest sizes in stock will be shipped.

.

.

## FREIGHTS.

.

.

**ALBAMURAL** and **MINERALBA** are classed as "Dry Paints," and are carried by all eastern Railroads at third and fourth class rates, respectively, for boxes (or bags) and barrels. Thus, to R. R. points east of the Mississippi River, the freight on barrels rarely exceeds one-half cent per pound, and is generally less than that. To your Station, from Bellows Falls, we will guarantee that the rate on barrel lots shall not exceed *12c* per 100 pounds.
